

360 Search Database

A user friendly search engine that will search within a variety of resources simultaneously.

1. Get Started:

- Go to: www.SouthRiverLibrary.org
Scroll to: Scroll to the DATABASES list on the left side of the screen
Click on: Click on 360 SEARCH
Enter card #: Enter the bar code number from the back of your library card and click LOGIN

2. Begin your search:

- Enter topic: Pick a topic to research and type it in the search bar.
Select database: Choose the databases you want to search by checking the box (or check SEARCH ALL to search all databases).
Search: Click the SEARCH button.

If not satisfied with the number of resulting records

- Return to the search page by clicking REFINE SEARCH and click the ADVANCED SEARCH button for more options.

3. Review your record results:

- Filter results: Filter your results by checking the FULL TEXT option at the top. Your list will now include only the articles that will show the full text and eliminate the articles that only show a summary or abstract.
Sort results: Select the sort option of your choice: DATE, TITLE, AUTHOR, or SOURCE.

If you want to keep a list of desired records to review later

- Select the records of interest by checking the box in front of the number and then click the EMAIL or EXPORT/SAVE option.
- You will need to select the format for your records. Select HTML format if not sure which to choose.

4. Review specific records:

- Select title: Click on the title of the article or book. The results will vary depending on the source.
Manage articles: Select the appropriate icons to PRINT, EMAIL, SAVE, CITE, EXPORT, or add to FOLDER for future reference.
Translate article: Click on the TRANSLATE button (if available) to translate the article into one of the languages on the drop down menu
Manage books: Click on the appropriate tabs to see book information, see inside the books, see the catalog record, place a hold on the book, or look for books on the same topic or by the same author.
